Office Action Summary	Application No. 10/628,329	Applicant(s) KENNEDY, KEN	
	Examiner Steven Wong	Art Unit 3711	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Drawings

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the movable member disposed in the opening to move the ball marker away from the magnetic material must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 3, 4/3 and 5/3 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The specification and claim 3 define a movable member disposed in the opening to move the ball marker away from the magnetic material. This structure is not clearly described so as to enable one skilled in the art to make the invention.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1, 3, 5/1 and 5/3 are rejected under 35 U.S.C. 102(b) as being anticipated by Tate (5,295,683). Regarding claim 1, Tate discloses a golf divot repair tool comprising a body (12), a pair of pointed arms (14, 16), a depression (18), a magnetic material (32) disposed in the depression, a ball marker (26) constructed of a material attracted to the magnet and an opening (34) formed through the depression.

Regarding claim 3, insofar as this claim may be understood, Tate anticipates the claimed structure by including a movable member (30) disposed in the opening (note Figure 2) which, when moved, moves the ball marker away from the magnetic material.

Regarding claim 5, note Figure 4 showing an annular magnet (32) centered in the depression.

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 2, 4/1, 4/2, 4/3 and 5/2 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tate (5,295,683). Regarding claim 2, it would have been obvious to one of ordinary skill in

Art Unit: 3711

the art to form the diameter of the opening in a range from 5 to 40 mm in order to accommodate ball markers with larger posts or in order to allow the user to more easily insert the post in the opening in the body.

Regarding claim 4, it would have been obvious to one of ordinary skill in the art to form the magnet of Tate as two separate pieces in order to eliminate the need to replace the entire magnet should part of it become damaged.

Regarding claim 5, note the rejection of claims 2 and 5 above.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
